Figure 1: Schematic representation of the experimental design. The diagram shows a sequence of events for a subject. It starts with 'Stimulus presentation' (a horizontal bar), followed by 'Response' (a horizontal bar), then 'Feedback' (a horizontal bar). Below these, a timeline shows 'Stimulus presentation' (a horizontal bar), 'Response' (a horizontal bar), 'Feedback' (a horizontal bar), and 'Stimulus presentation' (a horizontal bar). To the right of the timeline, there are labels for '0/0', '0/0', '0/0', '0/0', and '0/0'.

Figure 1: Schematic representation of the experimental design. The diagram shows a sequence of five horizontal bars representing trials. Each bar is divided into three sections: a left section for 'Stimulus presentation', a middle section for 'Response', and a right section for 'Feedback'. The 'Stimulus presentation' section contains a small diagram of a hand with a red dot indicating the starting position. The 'Response' section contains a small diagram of a hand with a red dot indicating the target position. The 'Feedback' section contains a small diagram of a hand with a red dot indicating the starting position. The sequence of trials is indicated by arrows pointing from the end of one trial to the start of the next. The trials are labeled 1 through 5 on the right side.
